		These Instructions	

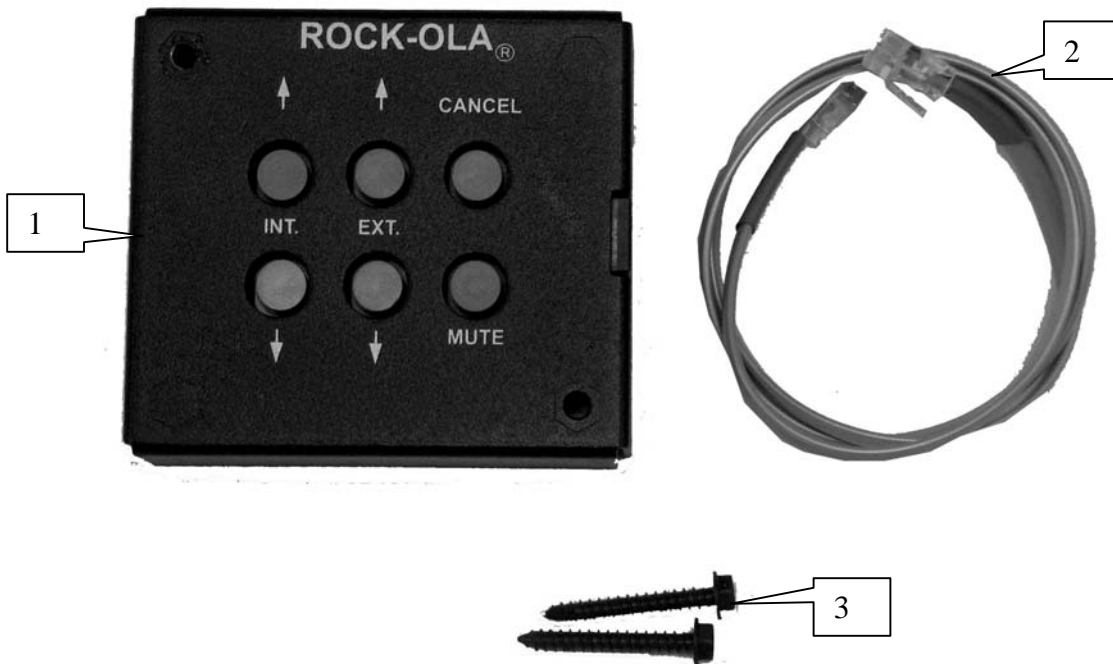

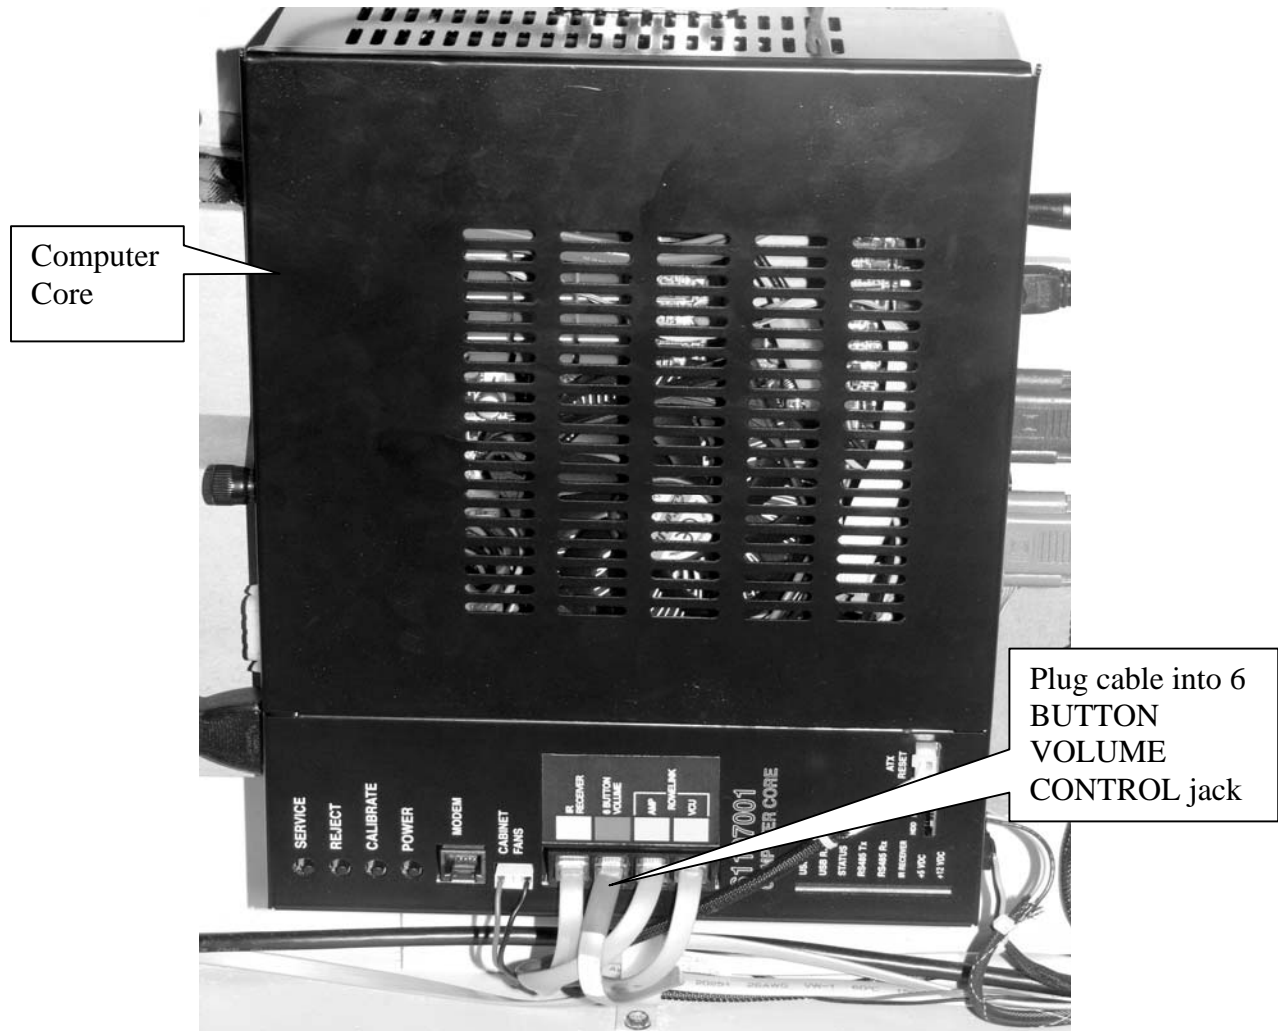

Figure 1

1. Route the Modular Cable (Item#2) through the access hole located in the rear of the jukebox to the Computer Core and connect to the red“6 BUTTON VOLUME” modular jack on the computer core. See Figure 2.

**Figure 2**

2. Connect the other end of the cable to the 6 Button Volume Control (Item #1). Find a suitable location to mount the 6 Button Volume Control using the two screws provided with this kit. Test the unit for proper operation.
