

Installation Instructions

NGX Secondary Amplifier Kit Kit #26679605

These instructions outline the procedures to install a Secondary Amplifier in your NGX or NGX Mini jukebox. **Note:** this kit will only work with 40991407 1000 Watt amplifiers. If you have an older amplifier, 40991404 or 40991401, you will have to replace that older amp with a new 40991407 amplifier before this kit will work.

Tools Required – 11/32” Nut Driver

Parts Included with this Kit:

<u>Item #</u>	<u>Part Number</u>	<u>Description</u>	<u>Quantity</u>
1	34113101	Harness - Interconnect	1
2	40991408	Secondary Amplifier	1
3	34113602	Bracket – Adaptor	1
4	87843000	#8-32 Hex Nuts	6

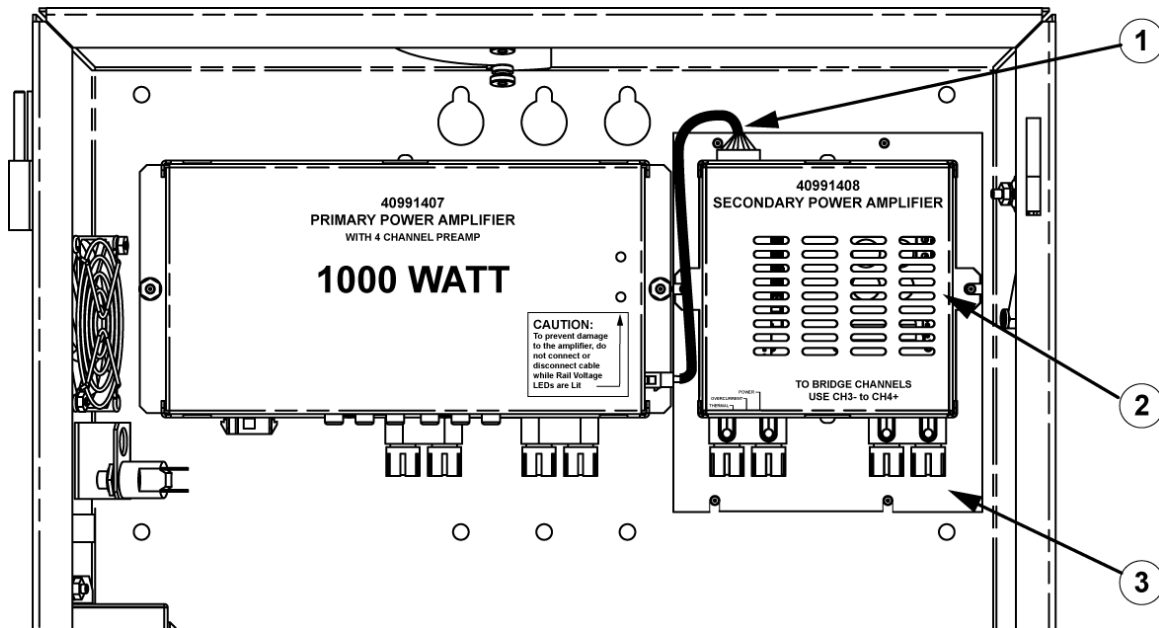

Figure 1

Caution: Power off the jukebox and wait for the Rail Voltage LEDs to go out before installing the Secondary Amplifier.

Install the Secondary Amplifier as shown above. The adaptor bracket is used in older cabinets that do not have the two new mounting studs. If not needed, the bracket can be discarded.

Connect the Interconnect harness from the Primary Amplifier to the Secondary Amplifier. Be sure the connectors are full seated.
