

It's important to determine the touch controller before confirming which touch glass sensor to use in the Curve with P-CAP touch sensor (monitor part number 61217305).

Touch Glass	Controller
61217330 uses	61217335 (CT609)
61217340 uses	61217345 (CT409)

There should be a sticker/label on the controller with the number CT609 or CT409. If there is no label, look for the CTx09 number screened on the board somewhere. Additionally, and maybe easier, CON1 on the board is marked red for CT609 controller as shown below. That connector is white on CT409 controllers.
